Dark Souls is a game that came out in 2011 and was published by FromSoftware. The game was developed by FromSoftware and had a very good review, which was so good that in 2012 it was developed into a second title: Dark Souls II. Dark Souls is known for a special kind of atmosphere and because of its lore. The only thing that may seem like an easy game is the fact that it only has dark graphics and no graphics at all. You, in the first game, can only kill things by bashing them's heads in. This game is also known for its incredible difficulty. In Dark Souls there is no health but you can kill much and can be very strong when you first start, but later in the game the experience you get is very good. I do not suggest that you play the game at full speed because if you do, then you can play the game only until you can finish it, all the later chapters in the game. A guide can be found at this page of this website. Below you can find my opinion of the game: 1. You are "the chosen one" and this game is your second part of life. 2. Your soul is stronger than you think. 3. It's only dark but not as dark as it can get. 4. Don't forget to die once or twice before you die. 5. You will get a lot of experience when you die. 6. Your health regenerates slowly, but not slow as compared to other games with a much more interesting lore. 7. Your weapon changes every level. 8. You will level up more when you die. 9. You can become very strong when you first start the game but also lose it over time. 10. If you reach a checkpoint or warp you will lose all the experience you gained on that chapter in the whole game. 11. If you die you lose a lot of time and money. 12. The game is a work of art. 13. Prepare to die a lot. 14. I will be glad if you come back and tell me what you think. 15. It is a very impressive game for many people. I have an important question for you: Why do you think we could not find a YouTube video with Dark Souls gameplay? And also a question for you: What are your thoughts about the anime?
