In this article, we'll discover how to use Photoshop CS6's new features to enhance our old images, lay out flat images, create artwork, and apply various effects and filters to images to get a completely new look. Steps 1. Open Photoshop. Choose Adobe Photoshop CS6 from the Application menu. Alternatively, you can launch Photoshop by double-clicking on the folder icon on your desktop. From the Open dialog box, you can set Photoshop to open the folder of images you wish to work on, choose a particular folder to open, or choose a specific image from a folder. In both cases, choose a folder, then open the folder you wish to work on. Once Photoshop has opened, you can navigate around and open images that you wish to work on. Select files by using the following methods: Drag and drop files from Finder, Windows Explorer, and other operating systems to your hard disk. From Photoshop's File menu, choose Open to open the folder containing the image you wish to work on in Photoshop. Choose Open > Image > Open from the menu bar. 2. Load a file. Open a file by using the same methods outlined in the previous section. You can also choose an image file from your hard drive by pressing Ctrl+N (Windows) or CMD+N (Mac). This opens the file in the Photoshop interface. If you're working with multiple files, you can use the Open dialog box to select the images you wish to work on and then use the File menu, from the menu bar, to load the files. To see other files in the folder, use the Folder menu. 3. Place a new document. To start, you'll create a new document. You can then start a new layer in the layer palette, by choosing Window > Layers. If you wish to create a new layer without first opening the layer palette, choose Layer > New > Layer. This will produce a new layer and place it over your existing layers. You can also start a new document at any time by choosing File > New. The New dialog box appears. Choose Photoshop Document from the Size list at the top of the New dialog box. The New dialog box should now contain a single, large white canvas with no layers. 4. Create a new layer.
