Q: What's the distinction between the days of havdala and the days of chagim? It says in this link: According to custom, a person makes havdala on the first and last day of the month, during each week of the month, and on the first day of each month It says in this link that There are two days for the Hagadda: The Hagadda on the 25th of Nisan (the month's anniversary of Israel's leaving Egypt); and on the 24th of Elul (the month's anniversary of G-d's deliverance from the hands of the Egyptians). I see it as two different customs - one in which you make a havdala on the same day you make a chag, and one in which you make a havdala on a different day from the date on which you make the chag. What's the difference? A: It's not two different customs (even though you call it two different customs). It's one custom which has two days of celebration. When there is a one-day holiday, the holiday is on both days, except for leap years, when it is celebrated on the 29th of Tishri and the 30th of Tishri. And the same day that is celebrated as the holiday is also the first day of the next month. This is called "the Hagadda" (הגדול מקדש, singular Hagadda) and it is often referred to with אומרים משפטי, so you might want to find a scholarly discussion of this. The Mishna in Masechet Hagadda (21a) mentions the first and last day of Nisan and the first and last day of Elul. The masechet Haga'at Hagadol (21b) mentions the first day of every month except the 13th (because of Shabbat) and the 29th of Tishri (because of the holiday). There are several more masechetim and halachot in the name. It is a masechet that is used extensively
