What's new in AutoCAD R13 Release R13 delivers the following new features and functionality:

Drawing Surface Rotation R13 introduces a new method for rotating a drawing's drawing surface by rotating all the drawing

elements in the model. The drawing surface is the surface that contains the original drawing elements, including the bounding box and extents that define the size of the original drawing. "Rotation" is done by rotating a transformation center and not the drawing surface. The new method doesn't change the drawing surface size or extents. The model's drawing surface is still bound by the extent of the original drawing and still uses the same origin point as the original drawing. R13 also introduces the `DRAFT_ANGLE` rotation command, which rotates the drawing surface by a specific angle, such as 45 degrees, 45 degrees clockwise or 45 degrees counterclockwise. This is the new default way to rotate a drawing when you create a new drawing using the `DRAFT_ANGLE` command,

unless you change it by modifying the INITIAL_TRANSFORMATION_ANGLE system variable to 0. Note: As of R13, if you change the INITIAL_TRANSFORMATION_ANGLE system variable to 0, you can no longer rotate

If he were the next astronaut to blast off, we wanted to know what kind of job we would need to do for him. Would it be similar to being his mother, wife, girlfriend or aunt? Would it be different? After all, this guy was just one man. I decided that if he were the next guy to blast off, I would be his mother and he would be my son. I said to his wife, "I'll be his mother." Her reaction was, "I'd like to be his mother, but I can't." My reaction was, "So what do you want to be?" She

didn't answer, so I answered for her. "Oh, I don't think so." My son didn't need a mom that couldn't be there for him. A lot of the time I feel like a single mother because my husband is the love of my life. We have a life together and I want it to be perfect. If anything should happen to him or me, we need to be there for each other. When I was having a rough time, I was thinking, "Would it be different if I was just on my own? Would I be better off?" It was that question that led me to understand the concept of motherhood. The more I thought about it, the more it made sense that there is only one person who can be a mother for our children and that's their mother. There is no one else to step in. There is only one parent, and if one is not there, the other one is. There is no competition between the two

of you. There is no role playing, just the facts of life. When they are older, they understand that. I was struck by the question, “Why can’t we all be brothers?” If they have brothers, they will get a good understanding of being a part of a family. They will understand how to deal with each other, and we’ll be there for each other. I’m not saying that mothers
