"Publish" functionality, creating files that include one or more drawing elements The Drawing Exchange Format (DXF), an open standard for binary data interchange Keyboard shortcuts The keyboard shortcuts listed are for the standard desktop edition of AutoCAD, and the commands are a slight variation of those in AutoCAD LT. Some shortcuts differ between versions and operating systems. For instance, the "Window" menu commands are by default at the bottom of the AutoCAD window, but in AutoCAD LT, they are usually on the "View" menu. In AutoCAD 2016, the "Workbench" menu is the main "View" menu. The AutoCAD Help system is comprehensive and provides detailed information on both the editor and the command set. The AutoCAD Editor Guide is a useful reference,

although it is primarily for a technical user, and was last updated in 2007. There are several Web sites which provide online AutoCAD Help, although not all of these are as reliable as the Help provided on the software itself. Some additional keyboard shortcuts are: , ca3bfb1094

AutoCAD [Mac/Win]

Go to "File -> Options" (Windows) or Preferences (Mac). Go to "Interface" tab and open "Install to my computer" button. Click on the "Download" button and wait a few seconds. Double-click on "AcadKey.exe" to install the key generator. In "Communication menu" of Autocad, you can find: "Active Licenses:" - Autocad - Account/Product type - License type "AcadKey user" - User name. This is the user name you use to log on. "AcadKey pass" - Password. This is the password you use to log on. "AcadKey global" - Globally active. If you want to be "acadkey" everywhere on all computers, you can use this setting. "Active License:" - "Application Type" - "AcadKey Global". "Account:" - This is your Autocad Account name. "Product Type:" - This is "acadkey". You can see that in the interface. "License type:" - Your current license type. You can change it by using "File -> Options" or Preferences. "Additional Information" - This is the key to the encrypted license file, which can be seen in "ACAD_LOG" file (inside Autocad folder), If you want to extract or reverse-engineer it, you can get the key from "Additional Information" table. What's New in the AutoCAD?

AutoCAD 2023 includes the new Markup Import and Markup Assist functions. Import feedback from printed paper or PDFs to work on your drawing while it's open in AutoCAD. Let the system analyze the file and make changes to your drawing automatically, without additional drawing steps. Then send the file back to your source for review and approval, and then reuse the exported file to save even more time. (video: 1:15 min.) There are two types of drawing input: Markup Import: Drawings with text or line comments such as "AutoCAD changed this," "please make sure this is correct," or "email us the original to review." This information is retrieved from the drawing files and incorporated into the drawing automatically. Markup Assist: Drawings with block comments. These are the in-drawing blocks of information such as "set this to X" or "this is a pressure zone." The information from these blocks is drawn into the drawing automatically. Both types of input are available with both the Web Access and the Windows client. The browser-based Web Access uses the web browser as a user interface, and requires the Internet connection for data transfer. The Windows client requires a network connection for data transfer. Both clients run in a separate window and can be operated independently. Importing Feedback from Printouts With Markup Import, you can import data into your drawing from a paper printout that was scanned or uploaded to your computer. Markup Import from an PDF When you select the Markup Import command in the Markup Assistant, an import window appears. Specify the file to be imported: Select the PDF file or folder to import. The downloaded file will be saved to the location you specified. Add a comment to the file: Click the Import button in the Import pane to import the file. Comments are added to the drawing and appear in the comment block. You can also add text in the comment block. Selecting All Text If a drawing contains complex text, you can select all the text in the drawing to be imported. Select the text you want to import, and click the Import button in the Import pane. The importing process is then the same as for a single file. Importing from an image
