Other CAD systems Some CAD systems have solutions for some of the more difficult technical areas. ArchiCAD, for example, implements a "pulling and pushing" method of diagramming. A series of handles and arrows are used to draw the complex shapes of diagrams. DWG-X also supports a similar system for drawing flowcharts and business processes diagrams. Abaqus CAE supports level set technology, which aids in solid modelling. Another area in which it has a unique advantage is load bearing modeling, where pressure (height) is taken into account.
