MobileWebHub 3 - jakubp
===== jakubp Hi! I
wanted to share my first
official app for iOS and
Android. It's a personal
feed aggregator. I think it
solves a problem of getting
to the top of interesting
feeds. More than 100 feeds
are in the app and each
one represents the newest
post by an author (A

subscription service is on the way). Feeds are in the free version, subscription costs \$1/week or \$12/year.

I'll also add a nice animation to onboarding (I think the current one is too harsh for iOS devices). If there's anything more I can do to improve the app, let me know. Any feedback is appreciated! [d0c515b9f4
