Let Me Die (inside) is an indie game about misery. It is not a typical quest, but a journey through a mindset of a struggling person to their dangerous end. Every time a character tries to live an ordinary day, he is tempted to commit suicide, change his mind, then change it again. The experiences a character goes through in the game are sometimes tragic, sometimes funny, but there is only one way to know what has happened to him by going through a series of confessions and suicide notes he is left with. At the end of every level, the player can find the beginning of a suicide note. If he wants to save the character and follow his wishes, he has to make it to the end of the note. If the character is drowned, pushed off a cliff, run over by a car, injured by a fire, etc. the player can choose the option to stick a gun to the character's head and trigger a silent, painless death. The player is encouraged not to play through the whole game, because suicide is much easier. If he dies, he can continue the game after a level select. The entire story is based on the protagonist's confession to his situation and is intended to provoke thought and bring new perspectives to suicide. The original intention was to have only three levels, but after finishing the first one, there was no way to stop creating content. I hope to have made a breakthrough with this game in allowing the player to take part in the character's thoughts and make a choice. **REVIEWS**

- "It was created with a crayon and a lot of love. The humor is great, the puzzles are engaging, and the main theme, confusion, is relatable to almost anyone." -Berkana Geek
- "Funny, thought provoking, and the music is lovely." -Hildegard Hoeffler
- "A unique piece of brain candy, Let Me Die (inside) will pull you into its twisted narrative and keep you there until the bitter end." -Redrum4
- "Highlights of the game are cool story telling, lack of formalism, and interesting soundtrack." -Stik
- "A cathartic experience that will have you talking to yourself." -SoloBronzeChild

Please, don't be offended if you see this kind of game as disrespectful or inappropriate. You can find suicide notes in every level c9d1549cdd

Q: Finding the inverse of a specific matrix I'm working on problem 1 from the attached link and was wondering if I could get some help with how to get from point A to B . I'm used to working with functions and have never worked with matrices before.

$$\begin{array}{ccc} 1 & 2 & 2 \\ 4 & 3 & 3 \\ 6 & 5 & 6 \end{array}$$

I've found a solution over here: [Wolfram Mathworld Inverse of the Symmetric, Positive Definite Matrix](#) I can verify the matrix is indeed symmetric, positive definite, and only has the eigenvalue 3 .
