Agricultural University \*Q: How do I pass parameters  
to a WPF User Control from the Main Window to the  
User Control I have a WPF User Control. It is  
referenced from the Main Window. This user control  
uses a service to call a WCF web service. It uses a  
series of nested classes to properly expose the  
methods I need. I would like to make a hyperlink on  
my Main Window which would call a method in my  
User
