A micro-experience, a meditation, an infinite puzzle! Approach an infinite number of objects through a very small, very black space and feel a unique emotional experience. You will perform an infinite number of gestures in a black space that will remain the same, not so very far from us. Only a few will have an equivalent at the time. Unium will find its own! Aaarrggghhhh. Thanks for the great reviews! They really motivated me to make some updates to the game and make it even more entertaining. Lots of great new stuff is coming! Also, I'm nearly done with the new version of the game, which I'll upload to the Play Store very soon. Before that, I'd like to let you know that I launched a new version of the game: the version 2.0. In this version, I've made some essential changes: * fixed more bugs * added some new graphics * added some user input more efficiently (without losing the title of easiest game on IOS) Sorry for the delay, I've been busy with my final exams until last week. I'm happy to tell you that I'm almost done with them and now I'm off to the land of Unium + Tech + PR! Been a while! Sorry! But I have finally finished the University. It was my third year and I passed with enough points to get a grade. I had my doubts but I passed! Anyway, I've been working on the game for a month or so and finally uploaded Unium to Google Play! Unium is now available on Google Play Store! It's the first puzzle game I've made and I'm really proud of it. I wanted to make a very similar game but infinitely simpler. Let me know what you think of it! I added a new chapter for you to challenge your intelligence and puzzle prowess. There are less items and difficult to find, but I hope you'll have fun with it. I think I've uploaded the last version for now. This time I've got way more points than the previous version and I'll probably release a new version in 2 months, which will contain all the new stuff I added in the last few weeks. I've got a couple of updates for you. The first is that the game is now available for the Google Play Store! The last version was available on IOS but not on the

Remarkable place to find this game. The artwork is simply stunning. Reminds me a bit of the 8-bit classics. Artistry and creativity abound. You can find a lot of good words about this game on GameFAQs. Enjoy, great experience. All of the sudden my roommate woke up at 4am and asked me to move his bed from the sofa to his bed.
