Bruno Lopes/Folhapress Marcelo Freixo e Maria do Rosário atravessaram a terra arrastando a barra de areia Um casal está no caminho da carreira política com seu segundo filho. O ano passado, em Curitiba, a candidata do PSOL à Câmara Municipal, Maria do Rosário, já havia pintado o rosto como Mersilânion, em referência ao filme “O Príncipe da Areia”, do mangá Os Confins. Agora o nome de “Bruno” foi dobrado para a próxima guerra de batalhas, no distrito federal, e Marina Silva, ex-senadora e candidata à Presidência, ainda parece anestesiada. Ele é a próxima guerreira da Coroa, em um futuro promissor. Para participar da Fórmula 1 dos Jogos Olímpicos de 2016, em Pequim, Bruno vai deixar a legendagem. Seu segundo filho, Hugo Freixo, já é membro da equipe garimpeira de “Renascimento”, a escolha da BMW, na TvC, com direito ao traje de cor de mostra, entre T-shirts, bombons e motosserras. Hugo é o motorista do “Bruno”. Sua paternidade já é conhecida à imprensa e há um filho na vida. Marina ficou na primeira página e Renan, o mais novo, entrou nesta semana na casa nobre de Zé Maria. Uma foi lembrada mas a segunda irmã de Marina, Ana Nieko, um nome atrativo? A primeira amizade entre Marina e Bruno veio pela mãe. ## What's New In?

The BMW 3-Series has received significant upgrades in many areas over the last few years. One thing it hasn't been upgraded in is utility - and that's what this patent aims to change. The BMW Connectivity Utility patent aims to equip us all with a single unified smartphone that can act as a multimedia, utility, navigation and weather receiver that we can plug into our car. BMW It's only a single patent - but it offers up a good chunk of the big picture. The patent covers a number of core items. BMW wants to integrate music, video, navigation, spoken word and spoken text information all together, with a view of removing some of the clutter that is usually in sight. With BMW Connectivity, we would be able to buy a single phone, plug it into our car and get all the information we need. If you want to find out more, check out the patent. Via BMW. You can read more about the patent here, and here. VideoQ: export/import of data from database (eclipse rcp) I'm working on an RCP application and need to create a feature that allows an import / export of data. I'll like to provide a generic functionality that I can use for every feature which requires such feature. Can somebody point me in the right direction please. A: In my opinion the best way to approach this is using a standard java File

or Zip File but in reality the problem is quite hard to solve and in my experience the Data Storage is not a generic functionality. What is on you have in mind is really a Data Import in the case of a real File or as an RCP application in the case of an RCP project. If you start out with a RCP project do not get to hung up on a general Data Storage. This all is just my suggestion. My work experience is from old companies where it was a issue and required a custom solution for every feature they needed. They as such have custom connectors I am sure to connect into whatever database system they needed. Also consider that for data import / export to work you will need to interface with the database (of course via the Business Layer) and thus will have to deal with permissions and other things that normally don't give you a lot of fun. I know it sounds intimidating but in reality it is not that hard to work with. Q: Difference between QMYS
