Frontpage Play Manga Maei About The Author oOo oOo I'm Tomoaki Muro, the writer, illustrator, and Art Director of Tarnished. I was born and raised in the Land Between and I've been passionate about RPGs ever since I was about 5 years old. Before creating this project, I worked as an assistant illustrator at Peach-Pie Studios. I hope you enjoy reading the story of Tarnished as much as I enjoyed creating it.oOo Bookseller Executive Producer Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. The developer of the game has started a fundraising campaign to bring this project to life. If you would like to support this endeavor and earn rewards, you can do so here : maeimai Green has been watching the screen of their game collection since childhood, one after another, taking pleasure in beautiful titles and tales, and one day, after much consideration, the real protagonist chose a game with an unfamiliar feeling. For the first time, they'd felt a change of mind, and a new adventure began... "A game where the hero's decision truly shapes the ending! As if our favorite drama were coming to life on the screen before our eyes, right before our very eyes! It was a game that made all these characters and events come alive in our very minds!" "I can hear the protagonist's voice loudly, as if his words were being uttered aloud. If I choose this path, I'll be able to reach the ending I want. By using my own strength, no one else can stop me. By making the path I choose by myself, I can reach my goal, that's what I'll become." This is a young man's choice. He casts his mind back to a world far in the past, where the sun rises in the east and sets in the west. He's learned to shed tears as he returns to the time when the night skies were lit by first light. His tears fall on the plains and fields, which have now changed to the color of the blood that mixes with the soil. He stands in front of bff6bb2d33

Field of the Invention This invention relates to a drive device for a rotating record carrier, and a process for the production of a smooth surface on such a record carrier. 2. Description of the Prior Art Several proposals have been made for recording and reproducing in the form of signals arranged as digital information as well as analog information on a rotary record carrier. In some of the known recording and reproducing processes the record carrier is comprised of a turntable on which a disc or platter having spiral grooves in the upper side thereof and embossed with an electrical image is mounted during recording and reproduction. The grooves function as data channels and the embossed electrical image represents an analog signal which in turn is received as an input signal. The known record carrier can be handled either manually or in a playback apparatus by a mechanically operating drive device, for example by a motor. The drive device causes the record carrier to rotate and thereby ejects the image at a predetermined radial distance of the record carrier. The information in form of analog signals or digital signals is picked up by means of a read head which scans the embossed image of the data channel. The record carrier has a protective layer on its surface, which is locally dissolved in case of reading from the data channel. The protective layer, for example of lacquer, serves, in particular, for protecting the data channels on a record carrier against influences, such as acids, for example. In case of an interruption of the rotation of the record carrier the data channel as such is dissolved by the mechanical drive device and on stoppage of the operation of the drive device then also the record carrier is destroyed by the dissolution of the protective layer. It is therefore desirable to so accelerate the termination of the dissolution of the protective layer that this can be effected without risk of damage to the record carrier. In order to provide

Fulham have won their Premier League season opener for the first time since 1978 as goals from DeAndre Yedlin and Pierre-Emile Hojbjerg secured a 3-0 victory at Huddersfield. Signed from Tottenham for £6.5m in 2016, Yedlin headed the only goal of the game before finding the net with a thumping late strike as Fulham ended the Terriers' unbeaten Premier League season to open with a win. Oliver Norwood was the only player to come close, forcing a great save from David Raya in the 33rd minute as the home side went in at the break with a one-goal lead. Fulham began the second half as they had started the first, with Hojbjerg and Yedlin combining for the former to round the goalkeeper to slot home. Adebayo Akinfenwa could have added to the lead in the 55th minute, but he shot just wide after a run down the left. Huddersfield found themselves struggling to compete, with only Mark Duffy able to make a concerted attempt on goal as the game descended into a scrappy affair. The deadlock was broken as the Whites looked to salvage a point, with a rare opportunity for the visitors opening the way. Andriy Yarmolenko's slip set up a final chance for Tom Ince, who shot wide. Ince will be hoping his previous
