history The first commercially available version of AutoCAD was released in 1985, and was initially available for the Commodore 64 and DOS platforms. A Windows version followed in 1987. A very important milestone in the history of AutoCAD was the release of AutoCAD LT. The basic architecture of AutoCAD was not changed in any way; the software was simply rebranded as "AutoCAD LT" and is a stripped-down version that lacked some capabilities of the full AutoCAD. AutoCAD LT is still available as a separate product for the DOS and Windows platforms. In 1997, Autodesk acquired 2D drafting software company Inprise Corporation for \$365 million. Autodesk has used Inprise technology to create the following products: AutoCAD, Inventor, D-Base, PaperDraw, and BlackBoard. Upgrading to new versions AutoCAD 2007 shipped with two main types of update policy, a freeware version (AutoCAD 2), and a fee version (AutoCAD 2007). AutoCAD 2007 was also available in two versions: a retail version, and a cloud version. AutoCAD 2008 shipped with two main types of update policy: a freeware version (AutoCAD 2008) and a fee version (AutoCAD 2008 Update 1). AutoCAD 2009 was shipped in two versions: a free upgrade to AutoCAD 2008 (AutoCAD 2009) and a fee version (AutoCAD 2009 Update 1). AutoCAD 2008 AutoCAD 2008 was a freeware version of AutoCAD 2009, and is available on Windows and for the Mac platforms. The 2008 version supports all standard features of the 2009 version. Autodesk released AutoCAD 2009 in June 2009 for both Windows and Macintosh platforms, in which the software is bundled with other software such as Photoshop, PDS (Power Point Slide Show) Viewer, WinZip, PDF, and Mathcad. The features for AutoCAD 2008 are: Drawing functions. Geometric shapes. Surface and polygon modeling. Topology editing and converting. Architectural design and drafting. Floor plan design.
