Is there a Ruby alternative to Python's socket.bind() method that allows TCP port listening? Since Ruby 1.9, it looks like the Net::TCPSocket class from the IO::Socket core module has the method bind_addresses that is a Ruby specific counterpart of the Python bind() method. However, this method is still in the beta version and has a significant Ruby memory overhead. Is there a more sane alternative? A: You can use threads to accomplish what you want. The server will have a loop like this: while true client = connect_to_client() client.gets #=> "hello" end And the client will have a loop like this: while true client.puts "world" end And then you can easily have multiple clients connected like this: require'socket' threads = [] loop do clients.each { |conn| t = Thread.new { loop do client = conn client.gets #=> "hello" end } threads

telecharger sketchup 8 pro francais crack telecharger sketchup 8 pro francais crack telecharger sketchup 8 pro francais crack Advertismment Windows 7 seems to run better overall, in spite of the fact that I haven't run into any problems with Windows 8. When Windows 8 became Windows 8.1, a few of the glitches I had with Windows 7 seemed to disappear, so I'll continue to use that operating system. I have a feeling that Windows 8 just didn't work all that well for me at the time and I was well on the way to developing a reputation for myself as a crack user. I've found that if I give Windows 8.1 a chance to work for a while, it will often work well. I like Windows 7 much better than Windows 8. One of my favorite features of Windows 7 is the Restore Point feature. Unfortunately, there doesn't seem to be any equivalent in Windows 8. Maybe there will be as the operating system matures. What I want to know is what I should do in this

situation, which I'll call... . Computers are easy to do anything on, but it can be difficult to do everything on. My computer seems easy to use, but it's also difficult to use. These are all bad things, but I can see that there is only one problem, and it's mine. I'll probably need to take up an entirely different set of skills to get my life back in order. I have to figure out why I'm having so many problems with Windows 8 and perhaps figure out some way to avoid them in the future. I want to avoid the problem in the future, but I'm sure there's no way to solve the problem now. If I can't solve the problem, I have to live with it. I have to figure out what I can do in the meantime. I can either keep using Windows 8, or switch to a different operating system. In other words, I have to do some heavy thinking. I can't just decide that everything is. Advertisement I have to choose between doing what I want to do with my computer, or doing what I don't want to do with my computer. That's the problem. I'll probably find more problems, and I'd better work on them before the day is over. Computers are so versatile that they can do everything, but they can't do 6d1f23a050
