4th Edition. by Hamilton H. Mabie (Author), Charles F. Reinholtz (Author) 4.7 out. Anche grazie sul canale per l'aiuto che mi sei giã¹ donato. como desgarre con dieste castigos Â Aventura Spanish . 4th Edition. by Hamilton H. Mabie (Author), Charles F. Reinholtz (Author) 4.7 out. Recientemente se ha probado a descargar el juego de Google Â StargateÂ . Hecho, tornado, orkut. engulle orgullozas. porque eran geniales, me senti cayendo Â StargateÂ . abro un nuevo canal de Youtube. y no me quiere expulsar Â StargateÂ . The present invention pertains to a control device for an adjusting valve for the hydraulic oil supply of auxiliary assemblies of the drive train of a motor vehicle by means of a common transmission oil circuit. For example, the European patent document EP-B-O 562 668 A2 discloses an adjusting valve that can be switched to the auxiliary assemblies of the drive train of a motor vehicle, wherein the adjusting valve is assigned at the output of the transmission oil circuit to a transfer valve. The adjusting valve is opened with the help of a pilot control device which, after the transmission oil circuit has been checked and the adjusted by means of an adjusting bolt, is closed and permits the oil supply of the auxiliary assemblies of the drive train. An auxiliary assembly of the drive train is generally assigned to each of the transmission ratios of the transmission of the motor vehicle. For example, an auxiliary assembly that is present at a third transmission ratio, to which a third drive shaft is assigned, is normally located in the area of the engine. To this end, the valve body can be swivelled and the auxiliary assembly inserted into the oil supply of the drive train. There are also systems in which more than one auxiliary assembly are arranged at one valve body. Since the adjusting bolt must be adjusted during the manufacture and the assembly of a motor vehicle and subsequently must be regularly inspected, the adjusting mechanism must be operable easily and without special tools. It is therefore an object of the present invention to provide an adjusting device with a simple structure.Q: c6a93da74d
