Httpwatch Professional License File

The free edition offers a plain HTML page analysis. HTTPWatch Professional can be used to record custom HTML/CSS pages for web site analysis. The analysis results can be viewed as graphically, using HTTPWatch Studio. HTTPWatch provides detailed performance analysis of web pages and embedded HTML codes. It gives you details about the following: URL, HTTP Method, total size, disk cache size, and cache time of the web page. The analysis results can be viewed as graphs. The software is licensed on the terms of the EULA. The full text of the EULA can be found here . The HttpWatch EULA allows for the free evaluation of the product for 30 days after initial purchase. It also allows the buyer to keep using the product for a reasonable time to explore performance options. After the 30 days have passed the buyer must agree to a one year license. The license is automatically renewed annually with one year notice from us. For example, you could have a Web server available at <http://www.domain.com> and another at <http://www.domain.com/production>. Whether you go with one or two, HTTPWatch 2.0 is required. The limit of two Web servers is not specifically limited and can be set as many as you wish. After installation, you must restart HTTPWatch before you use it. Restarting HTTPWatch is done the same way as rebooting, but select your script instead of the whole computer. If HTTPWatch is not already started, you must start it before you perform this task. Start it by clicking the HTTPWatch icon or hitting CTRL-D on the keyboard. This can be done either from the Host menu, under the HTTPWatch menu, or by clicking the HTTPWatch start button in the HTTPWatch window. 5ec8ef588b
