Q: Can a Vector3.SetValue method be written in C#? I am looking at some C# code that is creating a Vector3 array from a set of data: `public Vector3[] getVelocityData() { Vector3[] velocity = new Vector3[length]; for (int i = 0; i < length; i++) { velocity[i] = (Vector3)GetValue(i, velocityData); } return velocity; }` Is it possible to rewrite this line? `velocity[i] = (Vector3)GetValue(i, velocityData);` so it is not a direct assignment? I was thinking maybe: `velocity[i] = new Vector3(GetValue(i, velocityData));` But I don't know how to call the Vector3.SetValue method. Can anyone help
