“Photoshop” is also an iconic brand name—it’s a part of our culture. It’s what helps define us and what artists around the world rely on when they need to create professional-looking images. While it’s easier to say why “Photoshop” is the right choice for some, it’s more challenging to explain why to someone who’s never heard of it. It’s time to try a new name. One that reflects what Photoshop—and the people behind it—have always been about. One that you can grow with instead of fighting to grow away from. One that takes its heritage and plugs it into all things creative. One that’s inspiring artists around the world. One that will mean something to you, and to others. If you’re at all interested in digital image editing, this is one of the most exciting changes Photoshop has seen in many years. We believe strongly that designing with the Adobe name will help spread the word about what we’ve built, and grow our community even more. We believe this change can energize Adobe’s creative offering and unify our skillset on top of our other creative products.” We’ve spent more than 20 years building what they call the “Photoshop name.” Name recognition is extremely important to us; it’s how we made it to our current size and leadership position in the industry. Creating a new name for an industry heavyweights product is challenging enough. We felt that the challenge was worth the reward. They ask as if we were launching a tool designed to help people create war art. We have never and will never make a software product that is an art form. Our software is for people who want to create and share images.
